JAGHEER, or JAYGEER. An assignment of a part of the revenues of the state, to the superior officers of government, or for the support of individuals, or of particular establishments. They are either muskhoot, or guire muskhoot, that is, conditional, or unconditional. The grant of the former specifies certain services to be performed by the person upon whom it is conferred, and is usually given to officers of government, to be held by them whilst in office, but resumable on their office being vacated. An unconditional jagheer, does not specify any services to be performed. In Behar, the jagheers are almost universally of this kind. The grant was made under the seal and signature of the Vizier, for a certain number of daams, and the names of the pergunnahs, and amount receivable from each, were particularized on the back of the grant. The Dewan of the province, on the part of the King, gave a sunnud mutauluk, or grant corresponding with that of the Vizier. In this was specified the number and names of the villages appropriated for the discharge of the several quotas of rent receivable from each pergunnah.—The Nazim or Viceroy of the province then issued a perwannah gozausht, or order for delivering up to the proprietor the lands as particularized in the mutauluk sunnud of the Vizier: such a jag-

heerdaar is entitled to all the financial regalities of his jagheer, not only the crown rent, but all the subsequent sobahdary assessments, and additional receipts of annual rental, besides inferior local jurisdiction, with ordinary zemindary perquisites. Jagheers are neither alienable, nor hereditary; but on demise of the proprietor, revert to the government. It is for this reason they are always conferred under the authority of the Vizier, and not under the royal seal. Whilst the constitution of Delhi remained entire, the establishment of the Nazim Dewan, the Foujdars, and all the great officers of state, the charge of maintaining a fleet of armed boats at Dacca, to repel the attacks of the Muggs, the artillery, and all the principal departments of government, were provided for by assignments of the revenue of particular tracts of land, which were called, from that circumstance, jagheer mehals. The Zemindars in whose territories they were situated, were allowed a proportionate reduction in their jumma: but of late years, as the several Nabobs gradually threw off their subjection to the Emperors, the system of jagheers has fallen into disuse, and there are not at present more than two or three instances of their existence in the Bengal province.

them. *Jumma*, when applied to the customs, or to any other variable source of revenue, signifies the amount expected to be realized from them, or the amount at which they are farmed out.

Third, The crop which it produces. Fourth, The rate per beegah : and Fifth, The total annual rent of each ryot. As a new measurement does not take place every year, this account is annually liable to considerable changes. Thus if one ryot relinquish a portion of his land, and another takes it, or it lies uncultivated, in either case it will occasion an alteration in the original *Jummabundy*. KHAUM AUNADANY. Gross receipts of revenue in rupees of fort.

KHAZANEH NIMUCK. Is the value of salt delivered to Government, by the Zemindars of districts, which pay their revenues in kind, and where this article of produce is greater than any other. The word khazaneh, is used in contradiction to the word teekah, which only applies to the rents of the salt-works of such districts, as yield but a small quantity of salt in proportion to the grain, or other produce. In the khazaneh district, the Zemindar used to engage to deliver to government, the whole quantity of salt, that

K H O

his lands were supposed capable of producing, on receiving in advance, or on being credited in the amount of his land revenue, the charge of manufacturing it at a fixed rate. The difference between the prime cost so fixed, and the actual value of the salt, when manufactured, composed the fund from which the revenues of the district were discharged. From 1772, to 1777, the whole of the salt of Bengal, whether teekah or khazaneh, was manufactured on account of government, by the zemindars or farmers of the revenue, or by contractors, who stipulated to deliver a certain quantity from their districts, at a fixed rate; in case of an excess in the quantity, they received a premium; in the event of a deficiency, they forfeited a penalty. The contractor paid the usual rent or hire of the teeka salt works; but the khazaneh ones were exempt from any rent. In the former, the price of manufacturing the salt was advanced from the treasury; in the latter, the farmer or zemindar was credited in his accounts, for the amount. The salt thus manufactured on account of government was sold to merchants; and the difference in the price yielded a considerable revenue.

KISTBUNDY. Is an agreement for a stated payment of a sum of money to be discharged at different times. The jumma is thus divided into twelve equal parts, but as the payments must be regulated by the harvests, the equal proportion or monthly rents, are broken into $\frac{1}{2}$ months: thus Byfaack, $\frac{1}{2}$ month, Jayte $\frac{1}{2}$ month, Assar 2 months, &c. In some places taxes are imposed by adding a month's or half a month's rent to the jumma. The sale of the zemindary, however, shall be a full release to the zemindar, although the produce of it be not sufficient for the entire payment of the debt. If a zemindar pay his kists with punctuality, the security cannot

M A Z

take upon himself the management of his lands: but if he fails in the payment of half of any kist, government may dispossess him of the management, and allow him a subsistence of ten per cent. on the nett jumma, and his inheritance will still be answerable for the payment of the stipulated revenue, because, though removed from the management, he is not released from his engagements. The security, however, cannot take possession by his own authority, but must obtain the sanction of government.— If in the event of the security's being invested with the management of the zemindary, a balance should accrue, previous to a sale of the zemindary, an examination must be made into the accounts of the security, as the zemindar cannot be responsible for the security's embezzlements, during his management of the lands; should government have greater dependence on the zemindar than on the security, and consequently not allow the security to take upon himself the management of the lands on the zemindar's failure in his kists, the security must then be considered as released from his engagements.

All tenures of this kind are by custom considered hereditary, and consequently alienable by sale, gift, or otherwise, without the approbation of government, notwithstanding the strict letter of the Mohammedan law declares, that property held under a royal grant, being merely a matter of favour, cannot be devised or inherited.—Government however has never attached milkyet lands, whilst they were under mortgage to other persons.

From that period, the practice of mortgaging or selling them, has prevailed. It does not appear that government formerly exerted either the right or power of resuming these lands, except in cases of delinquency. The Nabob, Mohammed Rezah Khan, made several resumptions in Behar, in 1766, after the Dewanny was granted to the Company; but there is no precedent antecedent to that period.

He may be said to hold his office at the pleasure of the ryots; and as his influence and services depend solely upon the good opinion they entertain of him, it is not the interest of the Zemindar to remove him, as long as he retains their confidence.

The latter cultivates the lands of a village, where he does not reside, and is looked upon as a temporary tenant.

In regard to the mode of paying his rents, he is termed harry, tusseely, or khomar.—The harry ryot holds a certain quantity of land, for which he pays a certain fixed rent per beegah, whether cultivated or not; the tusseely ryot pays according to the particular crop which his land produces. Thus, land cultivated with mulberry, yields a much higher revenue than that cultivated with rice; the khomar ryot pays in kind, and gives a proportion of his crop, as the rent of his land.

It is used to express land granted in charity by Zemindars and other landholders, the revenues of which, to prevent any loss, either to the Zemindar, or to government, were for the first year only levied by a tax upon the ryots of the village, where this land was situated; but the loss arising from this donation, must ultimately, as is evident, fall upon government itself. It is by custom become hereditary, and also alienable.

But this term is more peculiarly applied to the account of the month of the year, in which the daily receipts are entered as they come to hand, up to the 29th of Cheyte; but the receipts of the 30th, are kept till the commencement of the ensuing Pooneah, when the several sums received within that interval are entered, with the date of the receipt of each, and being added to the receipts of the 30th, are consolidated into one sum, and placed under that day's date.

All Talookdars are supposed originally to have paid their rents in this manner, through the Zemindars or Chowderies; among whom,

it is believed, that the whole of Bengal was distributed. But in order to bring the waste lands into cultivation, they parcelled out, in consideration of a sum of money, or of the performance of particular services, or to provide for a relation or dependent, proportions of their districts, (which were henceforward called talooks) to persons subject to their authority, and who engaged to collect and pay to the donor an annual revenue.—An huzzoory talook, is considered as secure a tenure, as a zemindary, from the circumstance of the revenue receivable from it being, in general, mokuroory, or fixed; and because the proprietor is seldom deprived of the management of his lands, as long as he regularly pays his quota of the public revenue.

ZEMINDAR. A person who holds a tract of land, immediately of government, on condition of paying the rent of it. He is first in rank among the landholders; if a zemindar be unable to pay up the amount of his engagements with government, at the end of the year, such a part of his zemindary shall be sold, as will discharge the balance, and a sunnud from the khalfah granted to the purchaser; if he be dispossessed of the management of his zemindary, he is, nevertheless, exclusively responsible for all debts incurred by him during his possession, unless a mortgage was given on the zemindary, or the money borrowed applied to the payment of

the revenue; in both which cases the zemindary is answerable, in such manner however, as only to deprive the new zemindar of a part of his profits; but not to subject him to any loss, or affect the revenue of government; but no mortgage is deemed valid unless it be registered in the public cutcherry. Zemindars, by the nature of their tenures, have no longer a right to their lands than whilst they pay their revenues; in case of failure, the sale of their lands consequently is a more just and useful recompense to government, than subjecting them to corporeal punishment. Should they, however, at any time be prevented fulfilling their engagements, by unavoidable accidents rather than by their own mismanagement, equity will point out what indulgence they may be entitled to on that account.
